

LITEON GROUP

July 03, 2023

Dear Power Innovations International Partner,

We here at Pii are happy to unveil our new logo and announce other branding changes for 2023. You will likely find that we are implementing this logo in many different places over the coming months: it will be deployed on our digital properties, as well as our products, starting in July 2023.

We are also officially rebranding as **Power Innovations International**, or Pii for short. This rebranding effort acknowledges the remarkable growth around the world that we've seen over the last few years and officially incorporates our parent company - the world-class LITEON Technology Corporation - into our full logo. Our email and website domains remain unchanged at this time.

We may have a slightly new look, but we assure you that we are the same company that we've always been. Whether you have been with us from the very beginning or you are a recent partner of ours, please accept our sincerest thanks as we look toward the future.

Below you will see an abridged evolution of Pii's logos. Note that there are three official "versions" of our new logo in 2023. Contact us at www.powerinnovations.com/contact with any questions.
