

INTELLIGENT PDU™

MANAGEMENT & CONTROL

INTELLIGENT MANAGEMENT

The Intelligent PDU™ provides network-grade power distribution, remote/local monitoring, and outlet control. An Intelligent PDU allows for remote management, monitoring of PDU vitals, and control of outlets and networked clients. Power status can be monitored over the network, using the NetAgent Management Console and the RJ45 Ethernet port, or locally by using the digital LCD meter.

Why the Intelligent PDU™ technology is superior:

Highest Quality Power – High-resolution sine wave output

Most Reliable – Highest MTBF

Customizable – Made to fit your equipment needs

Fully Integrated – Plug-and-play modular design, no assembly required

Control from Anywhere – Remote management & app notification system

BENEFITS

- Schedule power cycle of attached equipment
- Remote management of multiple devices
- Redundant/selectable input capability
- Monitor power status over the network

FEATURES

- Upgradeable firmware
- SNMP network interface
- Switch-free design
- network-grade plugs and outlets
- retention tray
- durable metal housing

CUSTOMIZATIONS

- 1U or 0U rack sizes
- 8 to 24-outlet configurations
