

LITEON GROUP

Description

Power Innovations International's (Pii) family of rack mount accessories include shelf adapters and power shelf rail sets, and are mounted within Pii's rectifier and inverter shelves. Pii's shelves are designed to power accessory equipment for data processing racks, support full redundancy when configured independently parallel and integrate rectifiers, signal interfaces, and AC connectors.

Specifications

19" MGX to 21" ORV3 Adapter Kit

21" OCP 10U Power Shelf Rails (Set)

Model Numbers	KE-0001-014N	MT03146
Description	Adapter shelf for 19" MGX power shelf to mount with ORV3 power shelf rails	Rail set for 21" OCP ORV3 power shelf, used with KE-0001-014N
